

FROM PRINCIPAL'S PEN

Dear Parents

New session is the harbinger of new challenges, new resolutions, new aspirations new strategies and increased efforts . Session 2019-20 was a fulfilling year in academics with Arjun Pundir of class XII topping the Laksar area and was also awarded a merit certificate by C.B.S.E. for scoring 100% marks in Hindi. Board results have been consistently improving every year and students have also been excelling in sports and games bringing laurels to the school. This new session 2020-21 will see a separate wing- 'FIRST STEPS' coming up with novel ideas to nourish and encourage the little ones put forward their steps in the academic world with confidence and firmly walking jovially hand in hand with their mentors. Through this wing we hope to fulfill the long term needs of the society by nurturing childhood in a positive and carefree ambience to enable the young brains to experiment, explore and experience a new world of creations. We have always tried to give something new and unique to the students to maintain their interest in school life --- a proof of it being the ever increasing number of students with 100% attendance every year. This speaks volumes about the congenial environment inside the school building. Continuous counseling of students and teachers helps in achieving some desired goals. Students are also being sensitized towards many national and global issues too. Our students took out an awareness rally to encourage the people of Laksar to stop the use of plastic and also to stay united by running for Unity.

The Involvement of parents is very important for the overall progress of the students and hence PTMs at regular intervals are pre-planned and I would request all of you to attend the same in the interest of your ward. Low attendance of parents in PTMs not only disheartens the teachers but also proves an impediment in your ward's overall development because together only we can mould their personalities in desirable shapes. Wonders do happen if tried honestly and sincerely and I have full faith that our efforts in this regard will never cease.
