## NATIONAL MATHEMATICS DAY

### A REPORT

December 22 was designated as National Mathematics Day by the Government of India in 2012. This day is celebrated annually to commemorate the birth anniversary of the legendary Indian mathematician, Srinivasa Ramanujan. The celebrations aim to spread awareness about the importance of mathematics and highlight Ramanujan's remarkable contributions to the field.

The National Mathematics Day celebration at our school was organized by the Mathematics Department. The event commenced with an introductory speech delivered by Ms. Avni Kaushik, who elaborated on the purpose of the celebration. Ms. Shrishti Dhiman presented an insightful account of Srinivasa Ramanujan's contributions to mathematics, particularly highlighting the discovery of the Hardy-Ramanujan number 1729, famously referred to as the "taxicab number." Following this, the students performed a song emphasizing the importance of the concept of "zero" in mathematics. Additionally, a *Nukkad Natak* (street play) was presented by the students, illustrating the significance of mathematics in various fields and demonstrating its connection to other disciplines. The play underscored how mathematics is often regarded as the "superhero" among all subjects.

The Mathematics Department teachers also participated by performing a skit showcasing the application of mathematics in daily life. They explained the use of different units for measuring various objects and emphasized the importance of basic mathematical concepts in everyday activities.

### Conclusion:

The event successfully raised awareness about the importance of mathematics. The enthusiastic participation of students and teachers ensured that the celebration was both educational and enjoyable, leaving everyone inspired by the profound impact mathematics has on our lives.
